USER STORIES

**LIZZIE, SEVENTH GRADE STUDENT
BURNEY-HARRIS-LYONS MIDDLE SCHOOL**

Lizzie does not spend much time outside, but is excited to do more hands-on learning and less book work in science class. Going on field trips will be a welcome break in the year-long monotony of preparing for the Georgia Milestone standardized test. She is intrigued by her teacher's mention of an app for Tallasee Park as she is comfortable and savvy with technology.

**TRACY, SEVENTH GRADE TEACHER
BURNEY-HARRIS-LYONS MIDDLE SCHOOL**

Tracy believes in the power of hands-on and lab-oriented learning in middle school classrooms. She has concluded that the Tallasee Park app will be a great way to engage her class with environmental science in a low-stress manner. She is not fully sure of the app's logistics, but hopes for a group orientation to increase safety and efficiency when leading students on trips to the park.

**BEN & ALISSA
PARENTS OF MIDDLE SCHOOLERS**

Ben and Alissa love the outdoors, and are trying to find ways to help their children Ashley (12) and Xander (13) to engage with the environment. The couple hope to bring their children to Tallasee Park upon its public opening. They view the park's app as a possible way to engage their children with the outdoors while maintaining a healthy use of technology.
